SOUND FAMILIAR?

Missed calls
The phone rings under a car, and the customer books down the street.

Jobs in three places
Sticky notes, a paper schedule and QuickBooks, typed in again at night.

Money slipping through
Balances forgotten, and a drawer that never quite adds up.

Booked while you work
Customers book online day or night, and walk-ins check themselves in.

Every job, start to finish
One board, and repair orders with parts, hours and tax worked out as you type.

Cash that balances
Balances tracked until paid, a drawer count at close and an export for QuickBooks.

Built in a real shop
Built alongside a working Niagara repair shop run by a former Toyota master technician.

TODAY & SCHEDULE

YOUR WHOLE DAY ON ONE SCREEN.

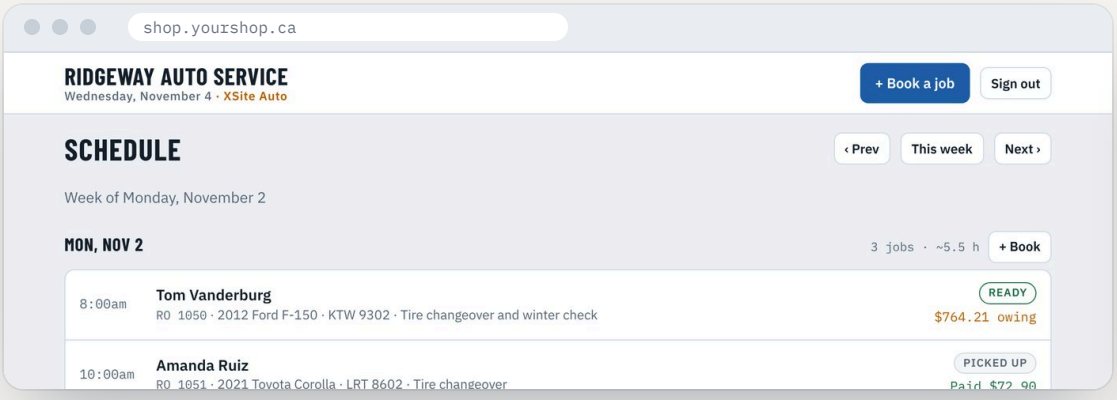

Open the app and you know where everything stands: who's coming in, what's on the hoist, what's ready, and who still owes you money.

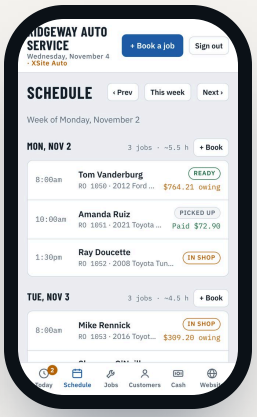

1 Requests flagged
Online bookings and walk-in check-ins show up the moment they arrive.

2 Money at a glance
Cash taken, all payments today, and what customers owe you.

3 Every car on the board
Booked, in shop, ready or waiting on payment, sorted by drop-off time.

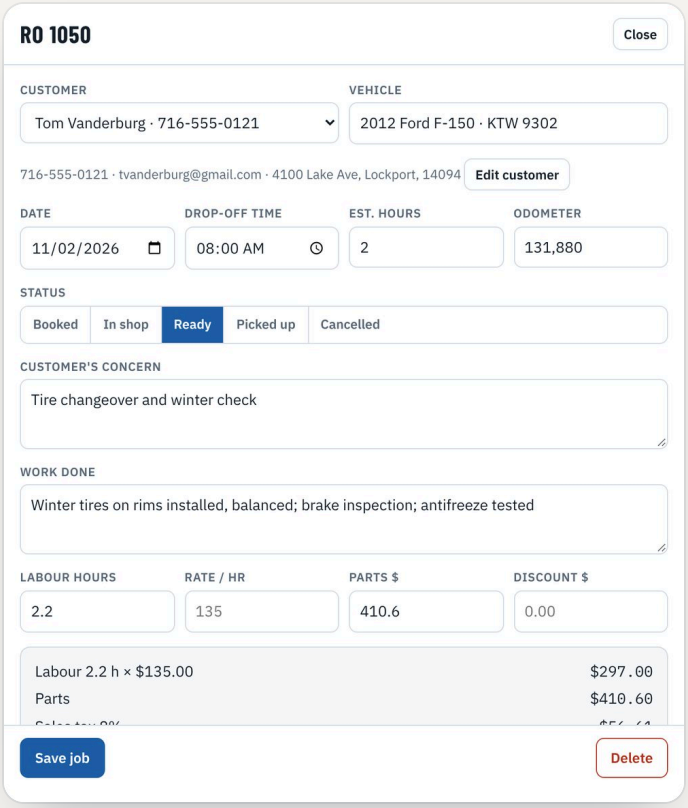

The week at a glance. Every day shows its jobs and estimated hours, so you can see how full the shop is before you book.

REPAIR ORDERS

EVERY JOB, START TO FINISH.

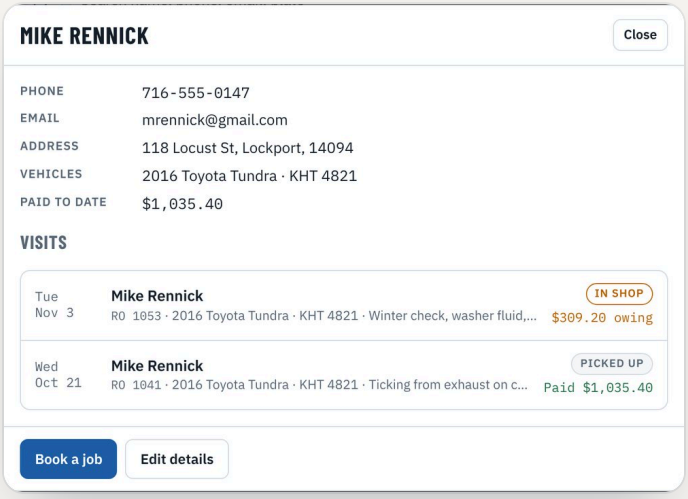

Book it, work it, get paid. Each repair order adds up labor at your rate, parts, discounts and sales tax, and keeps the balance until it's paid in full.
